The following information is provided so that you may compute the deduction for estate tax attributable to income in respect of a decedent (IRC 691(c)) when you receive distributions from the inherited IRA.

Item	Amount
Federal estate tax (Form 706, after credits)	1,764,000.00
Federal estate tax recomputed excluding the IRA (net value of IRD items)	804,000.00
Federal estate tax attributable to IRD	960,000.00
IRD included in gross estate - Fidelity IRA (date-of-death value)	2,400,000.00
Connecticut estate tax paid (separate; deducted under IRC 2058 on Form 706)	1,131,000.00

Each beneficiary owns 50% of the IRA. The deduction is allowed in the year IRD is included in your income, in proportion to the IRD you include over the total IRD. Only the federal estate tax enters the computation. Please share this letter with your tax preparer.
