Prior-year preparer notes (PY WP)

PY WP: 2024 IL-1040 overpaid (entity PTE tax credit + estimates) - refund \$2,100 expected in 2025; SALT was capped in 2024 so the refund will not be taxable (tax benefit rule - keep this worksheet). Stock basis is low because distributions have run close to income each year - watch for distributions in excess of STOCK basis (debt basis does not absorb distributions). 2026 planning: discussed a DAF 'bunching' contribution for 2025.
